n. **332192001/OE**

Validity:
2024/05/16

Functions and performance levels:

The item is intended for the protection of the knee and shin specifically against lofted stones and debris such as those riders often encounter in off-road motorcycling and in allied sports activities where these hazards may exist. It is not suitable to reduce the severity of injuries caused by impacts in case of accidents.

Method: hemispherical impactor – impact force transmission at 10J measured through piezoelectric force transducer incorporated in anvil.

Registered values: ≤ 27kN

Note: The protective functions depend on the correct positioning of the protector, which falls within the responsibility of the user.

Marking:

Printed on a label and displaying the following information:

- **CE Marking;**
- Name/Brand of the Manufacturer + full address;
- designation of the product;
- pictogram "i in the booklet" inviting the user to read the User Manual;
- additional infos: negative symbols for washing & care, warnings on the intended use/limitations of use.
